**Profile:** www.credly.com/users/nislam

## Google IT Support Certificate

**Issued by:** Coursera
**Issued to:** MAUNG NOOR. ISLAM
**Issued on:** 19 January 2022

**Description:** Those who earn the Google IT Support Certificate, developed by Google, have demonstrated their competence in foundational IT service and troubleshooting. Through hands-on activities and assessments, graduates develop proficiency in troubleshooting and customer service, networking, operating systems, system administration, and security, preparing them for entry-level roles.

### American Council on Education

**Course Number:** GOOG-0001 (v.1) **Total Credits:** 12 **Grade:** Pass

**Credit Recommendation:**

- 6 semester hours in computer information systems. in the lower-division undergraduate category
- 3 semester hours in computer networking. in the lower-division undergraduate category
- 3 semester hours in cybersecurity fundamentals. in the lower-division undergraduate category

---

## IBM Cybersecurity Analyst Professional Certificate

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 12 July 2022

**Description:** The credential earner is ready for a career in cybersecurity with demonstrated ability to solve real-world problems. The individual has obtained knowledge of cybersecurity analyst tools including data protection; endpoint protection; SIEM; systems and network fundamentals; as well as key compliance and threat intelligence topics important in today's cybersecurity landscape. The earner has also gained skills for incident responses and forensics.

### American Council on Education

**Course Number:** IBM-0016 (v.1) **Total Credits:** 10 **Grade:** Pass

**Credit Recommendation:**

- 2 semester hours in introduction to cybersecurity in the lower-division undergraduate category
- 2 semester hours in basics of networking in the lower-division undergraduate category
- 4 semester hours in digital forensics and incident response in the lower-division undergraduate category
- 2 semester hours in advanced computer concepts in the upper-division undergraduate category

---

## IBM Full Stack Software Developer Professional Certificate

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 1 September 2022

**Description:** This credential earner is equipped with the technical know-how to become a full stack cloud native application developer, utilizing skills to build, deploy, test, and manage cloud native applications. Earners have skills in languages including HTML, CSS, JavaScript, Node.js, React, Python, and Bootstrap. They have demonstrated proficiency with container technologies and databases. They also have competency with GitHub and concepts such as CI/CD, security, microservices, and serverless computing.

### American Council on Education

**Course Number:** IBM-0020 (v.1) **Total Credits:** 18 **Grade:** Pass

**Credit Recommendation:**

- 3 semester hours in Cloud Computing in the lower-division undergraduate category
- 3 semester hours in Web Development in the lower-division undergraduate category
- 3 semester hours in Server Development in the lower-division undergraduate category
- 3 semester hours in Cloud Applications in the upper-division undergraduate category
- 3 semester hours in Python for Data Science in the upper-division undergraduate category
- 3 semester hours in SQL Applications in the upper-division undergraduate category

---

## Data Analysis & Visualization Foundations Specialization (V2)

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 5 November 2022

**Description:** The badge earner has demonstrated a foundational knowledge of Data Analysis, Data Visualization, and Dashboard creation. The individual is able to explain what is Data Analytics and the surrounding Data Ecosystem. The earner is also able to perform basic data analysis tasks using Microsoft Excel spreadsheets, and has demonstrated the ability to work hands-on with Excel and Cognos Analytics to create various types of plots, charts, and dashboards.

### American Council on Education

**Course Number:** IBM-0022 (v.1) **Total Credits:** 9 **Grade:** Pass

**Credit Recommendation:**

- 3 semester hours in introduction to data analytics in the lower-division undergraduate category
- 3 semester hours in advanced data analytics in the upper-division undergraduate category
- 3 semester hours in intermediate data visualization in the upper-division undergraduate category

---

## Introduction to Cybersecurity Tools & Cyber Attacks

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 1 December 2021

**Description:** This badge earner understands the various types of malicious software and the evolution of security based on past cyber-attacks. They have gained an understanding of key cybersecurity concepts such as CIA Triad, Access Management, Incident Response, as well as key cybersecurity tools including firewall, anti-virus, cryptography, penetration testing and digital forensics.

---

## Cyber Threat Intelligence

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** MAUNG NOOR. ISLAM
**Issued on:** 22 June 2022

**Description:** This badge earner can describe examples of network defensive tactics, discuss data loss prevention and endpoint protection concepts and tools, and explore the IBM Security Guardium user interface to learn how to classify data in a database environment. The earner can describe security vulnerability scanning technologies and tools and identify the key concepts around threat intelligence. They have explored the IBM Security QRadar SIEM product and suspicious alerts and know how to take action.

---

## Cybersecurity Breach Case Studies

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 23 June 2022

**Description:** This badge earner can research and describe breach cases including the following scenarios: A third party software company breach where multiple clients are affected; Ransomware threats and the consequences to organizations; Exposed data through misconfigured servers; and the effects of a phishing attack and cybersecurity criminal threats. The earner can investigate a real-world security breach identifying the attack, vulnerabilities, costs and prevention recommendations.

---

## Cybersecurity Roles, Processes & Operating System Security

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 23 June 2022

**Description:** This badge earner understands the key cybersecurity roles within an organization and the importance of ITIL processes. They have a basic understanding of architecture, file systems, and basic commands for multiple operating systems including Windows, macOS, and Linux. The badge earner is also familiar with the concept of virtualization as it relates to cybersecurity.

---

## Network Security & Database Vulnerabilities

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 23 June 2022

**Description:** This badge earner understands network basics around the TCP/IP and OSI Models, as well as recount DNS, DHCP, Switching and Routing concepts. They can describe the structures and vulnerabilities of key databases for cybersecurity including SQL, Couch, Oracle and MongoDB.

---

## Penetration Testing, Incident Response and Forensics

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 23 June 2022

**Description:** This badge earner can describe penetration testing tools and the benefits to an organization, and can articulate the power of scripting. The individual can describe a deep dive into incident response techniques and tools. They also understand the basics around digital forensics and digital evidence.

---

## Cybersecurity Compliance Framework & System Administration

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 24 June 2022

**Description:** This badge earner has gained an understanding of key cybersecurity compliance and industry standards including NIST, GDPR, HIPAA, SANS and PCI. They have learned the role and function of server and user administration, as well as encryption, encoding, hashing and digital certificates as it relates to cryptography.

---

## Cybersecurity IT Fundamentals Specialization

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 24 June 2022

**Description:** This badge earner has completed the learning activities associated with the IT Fundamentals for Cybersecurity Specialization offered through Coursera. This specialization includes 4 courses. The individual has learned and explored concepts around system administration, cybersecurity tools, Operating System and database vulnerabilities, types of cyber attacks, and basics of networking.

---

## Introduction to Cloud Computing

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 13 August 2022

**Description:** This badge earner understands the basics of cloud technology and is able to describe cloud platforms and models including IaaS, PaaS, SaaS, and public, private and hybrid multiclouds. The badge earner is familiar with essentials of cloud applications and terms like Virtualization, VMs, Containers, Object Storage, Microservices, Serverless, Cloud Native, and DevOps. The individual has also gained hands-on experience at creating a cloud account and provisioning services on IBM Cloud.

---

## Web Development with HTML, CSS, JavaScript Essentials

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 18 August 2022

**Description:** This badge earner has demonstrated foundational knowledge of Web Development with HTML, CSS, and JavaScript. The individual can define and describe the languages, frameworks, and tools that are used to create interactive and engaging websites and Cloud applications. The earner has hands-on experience creating a web application using HTML, CSS, and JavaScript.

---

## Developing Cloud Native Applications

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 22 August 2022

**Description:** This credential earner has foundational knowledge of developing Cloud Native Applications. The individual can define and describe the significance of hybrid cloud infrastructures as well as two key areas of cloud thinking: modernization and continuous integration/continuous delivery. The earner can build, deploy, test, and run web applications in IBM Cloud and mobile applications outside IBM Cloud. The earner has hands-on experience building an IBM Cloudant connected, CI/CD enabled application.

---

## Container & Kubernetes Essentials V2

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 26 August 2022

**Description:** After earning this badge, this credential earner is able to do the following: build and run a container image; understand Kubernetes architecture; write a YAML deployment file; expose deployment as a service; manage applications with Kubernetes; use ReplicaSets, auto-scaling, rolling updates and service binding; deploy services; and reap the benefits of OpenShift, Istio and other key tools.

---

## Developing Cloud Apps with Node.js and React

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 27 August 2022

**Description:** This badge earner has demonstrated a foundational knowledge of Cloud Application Development with Node.js and React. The earner can use Node.js to parse JavaScript Object Notation (JSON) data from a Hypertext Transfer Protocol (HTTP) message and use routing, middleware, and templating to handle requests efficiently in activities like authentication, checking session information, and filling in dynamic content in front-end applications. The individual has hands-on experience.

---

## Python for Data Science and AI

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 27 August 2022

**Description:** This badge earner has the core skills in Python such as critical data structures, programming fundamentals and experience with core libraries for data science. They can apply this knowledge to work with data and develop applications for data science. The individual also has sufficient Python knowledge to work with Python libraries.

---

## Python Project for AI and Application Development

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 29 August 2022

**Description:** This badge earner is able to apply foundational Python skills by implementing different techniques to develop applications and AI powered solutions. The individual has acquired the confidence to begin developing AI enabled applications using Python, build and run unit tests, and package the application for distribution.

---

## Application Development using Microservices and Serverless V2

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 30 August 2022

**Description:** This credential earner has demonstrated proficiency in application development using microservices and serverless. The individual understands how serverless benefits developers, when to use serverless programming and serverless deployment models, and the top use cases and design patterns. The earner has hands-on experience with serverless programming concepts for creation, deployment, and invocation of cloud-based functions—including the deployment of microservices using OpenShift and Istio.

---

## Developing Applications with SQL, Databases, and Django

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 30 August 2022

**Description:** This credential earner has demonstrated foundational knowledge of developing applications with SQL, databases, and Django. The individual understands fundamental database concepts, such as the basics of SQL and how Object-Relational Mapping (ORM) allows you to use Object-Oriented Programming (OOP) languages to work with databases. The earner also has hands-on experience creating a Django web app to persist, process, and present data on a cloud-based web application.

---

## Full Stack Cloud Development Capstone Project

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 1 September 2022

**Description:** This credential earner has demonstrated deep knowledge of Cloud Native Application Development. The individual designed a dynamic user experience using GitHub actions to build, test, and deploy an application. The earner also developed frontend pages, actions for database operations, and created backend services. The earner developed a working cloud native application that integrated cloud native services, JavaScript, Django, JSON, IBM Cloud Foundry, Python, and Kubernetes.

---

## Data Analytics Essentials

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 7 October 2022

**Description:** This badge earner has demonstrated a foundational knowledge of Data Analytics. The individual can explain what is Data Analytics, list the key tools and technologies within the data ecosystem, and has a conceptual understanding of the data analysis lifecycle. The badge earner is also able to describe the technical and soft skills required to become a successful data analyst.

---

## Excel Essentials for Data Analytics

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 7 October 2022

**Description:** This badge earner has demonstrated a foundational knowledge of using Excel spreadsheets for Data Analysis. The individual can perform basic spreadsheet tasks for entering and formatting data, create formulae, prepare and wrangle data for analysis, and create pivot tables. The badge earner has also demonstrated ability to work hands-on with Excel and complete an exploratory Data Analysis project.

---

## Data Visualization & Dashboard Essentials

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 8 October 2022

**Description:** The badge earner has demonstrated a foundational knowledge of Data Visualization and Dashboard creation using Microsoft Excel spreadsheets and IBM Cognos Analytics. The individual can describe and create various types of charts and plots such as line plots, bar charts, pie charts, histograms, treemaps, scatter charts & map charts. The badge earner has also demonstrated the ability to generate interactive dashboards.

---

## Git and GitHub Essentials

**Issued by:** Coursera
**Authorized by:** IBM
**Issued to:** Maung Noor Islam
**Issued on:** 17 November 2022

**Description:** This badge earner has demonstrated how to use Git and GitHub as code repositories for developing applications. They understand why version control is essential in creating open-source and commercial software. The badge earner can create repositories and branches, perform pull requests and merge operations, and use these repositories to collaborate with their teammates.

END OF TRANSCRIPT

# ACE TRANSCRIPT LEGEND

The ACE Transcript is an official transcript that contains credentials evaluated by the American Council on Education (ACE). The following policies apply only to ACE-endorsed credentials within the transcript. ACE Learning Evaluations connects workplace learning with colleges and universities by assessing the quality and equivalency of nontraditional experiences. ACE's recommendations are intended to guide institutional decisions about the award of credit for prior learning.

ACE Learning Evaluations reviews are conducted by experienced college and university faculty who assess the content, scope, and rigor of an organization's educational program and make appropriate recommendations for comparable college credit and competencies achieved by learners. For more information on processes and standards for ACE reviews, visit https://www.acenet.edu/Programs-Services/Pages/Credit-Transcripts/Colleges-Universities.aspx.

## DEFINITIONS

**Issued On:** The date when the learner completed the associated credential.

**Issued For:** The learner's legal name as entered by the learner at the time of transcript request.

**American Council on Education Endorsement:** Credentials that carry an ACE endorsement of recommended college credits or validated competencies published on the ACE National Guide.

**Course Number (ACE ID):** ACE assigns a unique identifier to ACE-endorsed credentials (e.g., ACE-0001 (v.1)). The letter prefix designates the organization providing the experience. Version number is based on the date that the credential was earned.

**Credit Recommendations:** Contain academic subject area(s) recommended for credit aligning to a college course. Credit recommendations are designated in semester hour units (SH). Levels at which recommendations are issued include vocational/certificate, lower division (100–200 level courses), upper division (300–400 level courses), and graduate (500+ level courses).

**Competencies:** These competency statements are from recognized, industry-approved frameworks, and have been validated by the faculty team as outcomes demonstrated by learners who successfully complete the evaluated learning experience. They represent workplace-relevant skills, knowledge, and abilities expected of professionals in corresponding industries.

**Grade:** ACE-endorsed credentials are only included on this official transcript if the student achieved a passing grade. ACE-endorsed courses and exams meet the following minimum grading requirements: Students must earn a minimum grade of C for vocational/certificate, lower division, and upper division credit and a minimum grade of B for graduate-level credit. The credential provider might also supply the learner's actual grade under Evidence in the Learner's badge. Click on the Credential Title to access the badge issued to the learner.
